## ENLARGEMENTS: GLOSSY OR LUSTER FINISH

Our color enlargements are printed on Fuji Crystal Archive paper using traditional wet process.

Standard finish on enlargements from 35mm and 120 negatives is Luster. Please let us know if you prefer a different finish. You may submit a guide print with your machine enlargement order and we will get it close in color and density.

Guide prints must be submitted **AT THE TIME ORDER IS PLACED**. Sending guide prints after the order is complete is subject to custom prices. Matching color or density to another print is a Custom print. Same day rush service is charged as double the regular price.

### From 35mm or 120 Negatives, Transparencies or Digital Files
